6. Summary

The assessments result is that the IP Intercom Module C-ET962HR AA und C-ET970HR AA meets the requirements of the listed acknowledged rule of technology:

- EN 45545-2 hazard levels HL1 to HL 3

For regular (intended) operation the required level of personal safety is ensured.

The grouping rules for combustible materials according to EN 45545-2 must be considered for installation / integration in rail vehicles.

The assessment is based on documents provided by the costumer (see documents table).

This inspection report was written under the specified accreditation without influence of third party.
